- QA Engineer with 4+ years of experience in Manual and Automation Testing within the Banking and Finance domain
- Strong knowledge of SDLC, STLC, Quality Control processes, and Agile methodologies
- Hands-on experience in Web and Mobile Application Testing across multiple browsers
- Proficient in Smoke, Regression, Integration, Exploratory, and Browser Compatibility Testing
- Experienced in REST API testing, including request validation, authentication, negative testing, and response verification
- Domain expertise in ACH payment systems, validating transaction flows and recurring payment scenarios
- Skilled in backend data validation using SQL and MongoDB
- Expertise in test case design, test scenario preparation, defect tracking, and defect life cycle management using JIRA and ALM
- Experience working with Data-Driven and Keyword-Driven Automation Frameworks (POM, Page Factory)
- Strong analytical, debugging, and cross-functional collaboration skills with a focus on delivering high-quality releases

IT Skills

- **Testing Tools:** Selenium using JAVA, TestNG, Appium, Postman, VSCO
- **Framework:** Data Driven, Maven.
- **Languages:** Core Java
- **Operating System:** Windows, Linux.
- **Bug Tracking Tool:** Jira. ALM
- **Domain:** Insurance, Banking & Finance domain

Organization Name: Core Card Software PVT Ltd., MUMBAI, June 2025-Feb 2026

Project Name: - Core infinity Tesla Project

Core Infinity is a modern card-processing platform designed using a microservices architecture and the latest technologies. It covers all major card-domain functionalities, including Authorization, IPM, Posting, and Clearing.

- Performed end-to-end API Testing for ACH payment processing using Postman
- Validated authentication, input validation, idempotency, and transaction lifecycle.
- Tested multiple payment types: current balance, statement balance, minimum due, recurring payments.
- Executed positive and negative test scenarios for ACH scheduling (one-time, recurring, instant date)
- Verified payment scheduling logic including backdated setup and cutoff handling.

- Conducted data validation using SQL and MongoDB.
- Created and executed detailed test cases and test scenarios.
- Logged and tracked defects in bug tracking tool and performed retesting.
- Ensured data consistency across API, database, and transaction flows.
- Collaborated with developers and business analysts to validate business rules

Organization Name: AQM TECHNOLOGIES, PVT Ltd., Feb 2025-May 2025

Organization Name: TCS, Mumbai, March 2023- Jan 2025

Project Name: - Continental Bank FS Cloud

- Validate the functional & non-functional requirements for ambiguity, scope, creep, detail and testability.
- Transformed Business and System requirements into test scenarios, test step, test case, test data requirements.
- Work with developers for understanding the Change Request, Service Now Incident & Internal Defect.
- Setup test data and execute test cases. Document defects and conduct defect reviews.
- Handling ACH and Digital transaction, standing order, schedule day, incoming file processing transaction etc.
- Share my understanding of the system intended structure and behavior with fellow tester and with client-side team.

Organization Name: ApMoSyS Technologies, Navi Mumbai, Nov 2021-Jan 2023

Project Name: - Quiklyz

- Analyzed and understood functional requirements of Web and Mobile applications
- Developed and maintained Automation Test Scripts to validate end-to-end functionality across modules
- Performed Functional, Regression, and Smoke Testing to ensure application stability
- Executed automation for cross-browser and mobile platform testing
- Modified and enhanced automation framework/scripts based on requirement changes
- Provided production support, performed issue analysis, and validated hotfix deployments
- Collaborated with cross-functional teams to ensure quality releases in Agile environment

Academic Details

- **2021: MSC.CS (Computer Science)** from SST College, Ulhasnagar.
